DETAILED ACTION

This Office Action is responsive to Applicants transmittal of new application, filed 02/03/2006. Claims 1-20 are pending.

Information Disclosure Statement

Applicants' information disclosure statement (IDS), filed on 06/05/2006 has been considered. Please refer to Applicants' copy of the 1449 submitted herein.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 7, 10, 14, & 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeda *et al.* (EP 253666; see IDS). Said patent discloses compound RN 115720-17-7, shown below, which anticipates formula I of the instant application wherein **R₁** = substituted alkyl and **R₄** = alkyl.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of **Claims 1-20** of prior U.S. Patent No. **6,936,638**. This is a double patenting rejection.
